

INTRUSION

Powerful. Integrated. Scalable.

Prescient combines advanced intrusion detection with access control in a single, unified platform—designed to protect what matters most.

ZONES & CAPACITY

Supports intrusion, 24-hour, keyswitch and specialist zones including medical, smoke, environmental, pressure and more. Up to 136 zones per DN4 and 8,300 zones across a 64-controller system.

AREAS / PARTITIONS

Unlimited areas/partitions for flexible site segmentation and granular control.

SCALABLE PLATFORM

Supports up to 64 DNA4 controllers, each expandable with up to 8 PEX-161 modules via RS-456 sub-network.

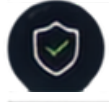

HARDWIRED EXPANSION OPTIONS

Wide range of expansion modules for additional inputs, outputs, relays and reader connectivity.

WIRELESS INTEGRATION

Works with standalone wireless systems via output triggers. Future wireless integrations under development.

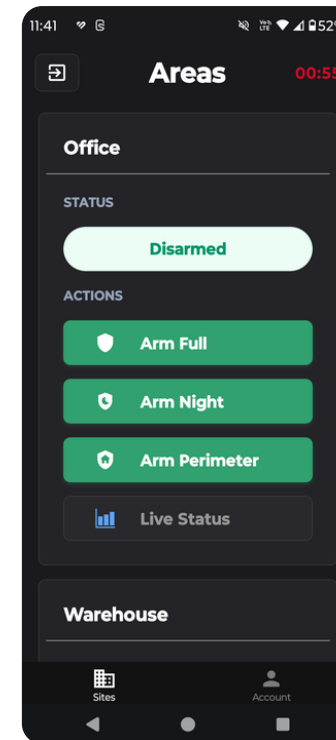

ACCESS CONTROL INTEGRATION

Unified access control and intrusion management enables automated arming/disarming, access restrictions and intelligent event-driven responses.

GRAVITY APP

Access and intrusion are tightly integrated—enabling automated arming/disarming, access restrictions and event-driven automation.
