

PROVE[®]

PSE-IL | Vandal-Weather Resistant Keypad

Designed for reliable operation in demanding environments, this rugged keypad delivers exceptional durability and performance for both indoor and outdoor access control applications. The PROVE PSE-IL offers superior resistance to vandalism and harsh weather conditions.

Key Features

- Suitable for both indoor and outdoor installations
- Robust chromed Zamak metal construction for durability and an attractive finish
- Vandal-resistant design for high-security environments
- Highly weather-resistant for reliable outdoor operation
- 12V or 24V DC backlighting options
- Compatible with Presco PAC access controllers and all Presco decoders
- Supports keypad installations up to 1 km from the door controller (subject to power supply and cable specifications)
- Uses low-cost, non-shielded cabling throughout the system
- Ultra-slim profile with only a 12 mm face thickness when installed
- Simple installation with optional surface or flush-mount kits
- Two-wire operation (third wire required for backlighting)
- Audible feedback confirms all user actions
- Works out of the box, no programming required with PRESCIENT DN4

Each unit factory tested with 5 year warranty included
